

# Full-Stack Developer

**Location:** Remote (Worldwide)

**Type:** Full-Time Contract (Part-Time considered)

**About Us:** We are a US-based startup of career professionals building a web platform for analyzing and visualizing carbon offsets data. We are a fast-growing product that was recently part of the Techstars accelerator.

Currently, we are seeking an experienced Full-Stack Developer to join our yet small team. This role is ideal for a self-starter who is eager to make decisions, take on responsibility, and drive the technical direction of the product. We will consider applicants located worldwide.

## Key Responsibilities:

- Develop, and maintain the frontend and backend of our existing web application (stack: React, Next.js, TypeScript, Postgres).
- Play an active role in product development by making key engineering decisions, offering innovative solutions, and helping to define the technical direction of the platform.
- Continuously improve the performance, scalability, and security of the application.
- Occasional automation tasks to manage data, making Python knowledge a strong advantage.

## Key Requirements:

- Strong experience in both frontend and backend development, particularly with React, Next.js, TypeScript, and Postgres.
- Ability to work independently and make informed decisions that drive the project forward.
- Willingness to take initiative and help us shape the product.
- Azure, Python knowledge and experience with data visualization is a big plus.

## To Apply:

Please, send us your resume to [clever@cleveroffsets.com](mailto:clever@cleveroffsets.com). We look forward to meeting you.
